

Trumpet, B-flat

Date

1905 ca.

Primary Maker

Johann Eduard Kruspe

Description

Rotary-valve trumpet with horn-like side-action string rotary valves, very likely influenced by the collaboration between Kruspe and the Philadelphia hornist Anton Horner (1877-1971). In ca. 1900 the Kruspe firm developed a horn with string-rotary valves in collaboration with A. Horner, now known as Horner model. Brass; with nickel-silver trim. Three rotary valves with string linkages.

Dimensions

Height: 457 mm (18 in) Bell diameter: 140 mm (5-1/2 in)
