

## Conch shell trumpet

### Date

1920-1940 ca.

### Description

Large conch shell with 4 spiral chambers and smooth interior with pink coloration. Made from the shell of the species *Lombatus gigas*, the "Queen Conch," native to tropical waters of the Atlantic ocean. Formed into trumpet by cutting off the apex of the shell, forming a rudimentary embouchure hole.

### Dimensions

Overall length: 254mm
