

## Flute, C

### Date

1750-1770 ca.

### Primary Maker

Richard Potter

### Description

Boxwood body in four joints. One silver key (D#) with plain square key head, mounted in a turned ring. Ivory ferrules and headcap. About 1745, Potter established his workshop after an apprenticeship with John Bickerton, a London turner, beginning in 1740. While perhaps best known for his innovative patent improvements of 1785, Potter's early skill is demonstrated in this example.

### Dimensions

Overall length: 602 mm Sounding length: 544 mm

Embouchure: 9.8 mm x 9.4 mm
