

diameter: 141 mm

## Flugelhorn, B-flat

### Date

1905-1910 ca.

### Primary Maker

Anton Konrad Hüttl

### Description

Brass, German silver, single loop, telescopic tuning slide at leadpipe, three rotary valves (1,  $\frac{1}{2}$ ,  $1\frac{1}{2}$ ), horseshoe stop, Leipzig spiral-spring return. This instrument resembles the Bohemian long model B-flat flugelhorn depicted in a catalog from ca. 1925 by Josef Glassl in Graslitz. It was therefore made during the era of Anton Konrad Hüttl jun., who died in 1920, and not while the firm's founder Anton Konrad Hüttl (1826-1901) was still active.

### Dimensions

Height: 436 mm Tube length: 1294 mm, 1304 mm Bore diameter receiver: 11.9 mm Bore diameter valves: 11.2 mm Bore diameter tuning slide: 11.3 mm, 11.2 mm Bell
