

# Basic Detail Report

---

## Trompe de chasse, D

### Date

1860 ca.

### Primary Maker

Pierre Louis Gautrot

### Description

Brass; French rim; seven coils; tube segments overlapping without ferrules. Unusual mouthpiece with cast floral ornaments. Typical, multiple-coiled, nineteenth-century French hunting horn. The firm Gautrot was founded in 1845 by Pierre Louis Gautrot. The trade names Gautrot-Marquet and Gautrot aîné were used from 1875 onwards. Specializing in cheaper-quality brass instruments, this firm could offer lower prices than any of their competitors. This is reflected in this plain, undecorated instrument. The only decorative element is the mouthpiece, which may be original, since the very small size of the receiver requires a special mouthpiece.

### Dimensions

Height: 309 mm Tube length: ca. 4590 mm Bore diameter (initial, minimum): 7.4 mm, 7.0 mm Bell diameter: 222 mm
