

## Slide trumpet, straight, B-flat

### Date

1950 ca.

### Primary Maker

Buescher Band Instrument Company

### Description

Brass with gold-brass finish, German-silver (outer slide), chrome (inner slight); straight tubing with single slide; tuning slide between outer moving slide and bell, fixed with a wing screw. To facilitate playing, the mouthpiece receiver and the outer moving slide have a brass handle each. The mouthpiece receiver handle allows to hold the inner slide in a fixed position, while the handle on the outer slide allows it to be moved. The handles are positioned perpendicular to the main tubing and face in opposite directions for handling with the left and right hand respectively.

### Dimensions

Height/Tube length: 1336 mm Bore diameter (initial, minimum): 10.9 mm, 10 mm Slide bore diameter: 12.3 mm (0.4844 inches) Bell diameter: 76 mm
