

Diatonic harp

Date

1500-1650 ca.

Description

The very early instrument has a typical resonating chamber, the back carved to a linenfold pattern, the simple post grooved, the neck and pillar modern replacements by the Bisiachs, to restore the irreparably worm-damaged original.

Dimensions

Maximum height: 1418 mm Width across top: 575 mm
Soundbox length: 1122 mm Soundbox, maximum width: 213 mm Soundbox, minimum width: 110 mm Length, longest string: 1219 mm Length, shortest string: 123 mm
