## Diatonic bell harmonica

### Date

1935-1945 ca.

### Description

The harmonica is built into the front part of the wooden frame. Two bells are mounted on individual base plates behind the cover plates with spring levers to ring them. The bells are not tuned to the harmonica. According to Bates, this is an unusual bell model, quite different from others in his collection.

### Dimensions

Length: 8 1/8 in Width: 2 1/2 in
